

AI USAGE DISCLOSURE

Student information

Name: Saliq Neyaz

Matriculation number: [fill in]

Project title: Conflict, not confidence: which value→RT mapping best describes probability discounting, and does RT help?

Group members, if applicable: Ashhad Raza Quadri, Saliq Neyaz, Maria Alejandra Pabon Galindo

AI use statement

Please tick one option:

☐ **No AI tools used.**

I confirm that I did not personally use generative AI tools, AI-based writing assistants, translation tools, image generators, code assistants, or similar AI systems in preparing my contribution to this project.

☐ **AI tools used and disclosed below.**

I confirm that I used AI tools only in limited and transparent ways that preserved the independent character of my work. I remain fully responsible for the accuracy, academic integrity, citations, methodology, code, analyses, and final submitted content.

[Tick exactly one box above (replace its \square with \blacksquare), then delete this note.]

Details of AI use

If no AI tools were used, write “Not applicable” in the first row.

AI tool used	Purpose of use	Parts of the project affected	Extent of use / student responsibility
[tool and version]	[what you used it for]	[which sections, figures or functions]	[how much was AI-produced, and your statement that you checked it and can explain it]
[tool]	[purpose]	[part]	[extent]

[Note. The course permits AI for language and grammar correction, formatting, high-level brainstorming, and help understanding or debugging code, but *not* for generating the substantive argument, analysis, interpretation of results, final prose, or complete solutions. Declare here, honestly and specifically, every use you personally made, including any AI-assisted material that entered the shared report, code, analyses or figures. Delete this note once the table is filled.]

Prompt log

Did you retain a prompt log or notes documenting the AI-assisted steps?

☐ Yes, attached or available upon request.

☐ No AI tools were used.

☐ No prompt log was retained. Explanation: [explanation]

Individual contribution and responsibility

Briefly describe your own contribution to the project, including report writing, coding, modelling, analyses, figures, or interpretation of results:

I owned **RT model M2 (decision uncertainty, $\mu = a - b|2P - 1|$)**: its specification, psychological motivation, fitting and evaluation. I also built the **inference machinery** (MAP objective, priors and their justification, the L-BFGS-B optimiser with multiple restarts, the MLE cross-check and the likelihood-curvature identifiability diagnostic) and the **test-retest reliability analysis** (Pearson/Spearman/ICC, bootstrap CIs, paired CIs on reliability differences).

The work was divided equally in three. Shared components – the valuation model and choice rule, the shifted log-normal RT distribution, the model-comparison framework, the figures and this report – were developed jointly, and I reviewed and accept responsibility for the parts I contributed to.

In the case of a group project, I confirm that I have reviewed the shared report, code, analyses, and figures to which I contributed. I accept responsibility for my own contribution and for any AI-assisted material included in shared components that I reviewed, used, or submitted as part of the project.

Final confirmation

I confirm that I have not submitted AI-generated content as my own without review, verification, and disclosure. I have checked all factual claims, references, data, code, analyses, and interpretations myself. I have not entered sensitive, personal, confidential, or copyright-protected material into AI systems in violation of data protection, copyright, or course rules.
